(301) 473-3404

<https://samgamage.dev>

## Summary

---

- Experienced software engineer highly efficient in all areas of the stack with 4+ years' experience working in development teams to produce high-quality software utilizing a wide range of technologies, programming languages, and agile methods that resulted in high-quality mobile applications and web user experiences.

## Education

---

Georgia Institute of Technology, Atlanta, GA

Fall 2019 - May 2022

Bachelor of Science in Computer Science with a focus in AI and Media

GPA: 3.9/4.0

## Work Experience

---

Data Fusion Specialists (DFS), Rome, GA

Lead Full Stack Developer

June 2021 – February 2023

- Led the development of a RESTful API using microservices with Node.js and Python for [Coeus](#), a SaaS that allows customers to train custom AI models that power complex virtual assistants.
- Worked closely with the IBM team to help grow their Watson Assistant product to a market of millions of small businesses that currently do not utilize an AI chat solution for customer service.
- Led the design and implementation of the Coeus dashboard using React and TypeScript which integrated with Stripe, Authentication systems and RESTful APIs allowing for a streamlined customer UX.
- Implemented event-based architecture across all our backend microservices using Apache Kafka which allowed us to maximize application efficiency, data quality, scope, operability, and flexibility.
- Deployed services to staging and production environments on AWS EKS using Terraform and setup automated CI/CD workflows using ArgoCD and GitHub Actions.
- Optimized the creation of Coeus demos by creating an application that can automatically train and provision resources to create a custom demo from a small set of data, reducing turnaround time by up to 30%.

UI Software Developer

June 2019 – June 2021

- Designed and implemented the Coeus web chat widget utilizing JavaScript, TypeScript, Tailwind CSS, and React.js that can be easily embedded onto a customer's website.
- Wrote 50+ unit and integration tests to verify the functionality and accessibility of chat widget user interface and connectivity to backend systems.
- Designed and developed a reusable, well-tested React component library and design system with Figma and Storybook.js for visual testing and documentation.
- Rebuilt the [company website](#) using Gatsby.js utilizing content sourced via GraphQL from a CMS, resulting in a performant site, and increasing our number of monthly visitors by 50%.

Embraer, Melbourne, FL

GUI Developer

October 2018 – June 2019

- Worked with a team of skilled designers and engineers to create a suite of dashboard components in React.

## Projects

---

[Med Manager](#)

January 2021 – May 2021

- Worked with a team of engineers through Georgia Tech to design and develop a cross-platform medication tracking app using React Native, Node.js, Twilio and MongoDB.
- Developed majority of the frontend screens, components, routing, state management library, and critical backend functionality utilizing agile planning with 2-week sprints and daily standup meetings.

## Skills

---

### Languages:

JavaScript, TypeScript, HTML/CSS, Python, Java

### Frontend Technologies:

React.js, React Native, Gatsby.js, Next.js, D3.js

### Backend Technologies:

Node.js, Docker, Kubernetes, MongoDB, PostgreSQL, Redis

### Other:

Git, Agile/Scrum, Azure, AWS, Terraform, Linux, Bash
